

Thank you David Laites!

February 2017

Calusa Waterkeeper Board member **David Laites** made a generous donation of two YSI Dissolved Oxygen / Salinity meters for the Calusa Waterkeeper Volunteer Ranger program.

This donation will enable two of the more than 10 Rangers to monitor oxygen concentration and salinity in the monitoring zones they have volunteered to work in. These are critical tools that enable the Ranger program to generate reliable data that can be used to professionally advocate for clean water. The Ranger program has seven designated zones for monitoring so we have five more meters to purchase.

Is there another generous donor out there? Please contact us at www.calusawaterkeeper.org.
